Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hinds, Jr. (US Patent 3,791,630) in view of Pardo (US Patent 5,281,426).

Hinds teaches a plurality of work stations including at least two immersion chambers operating at different temperatures, each work station including an ingress and egress for product transfers. A transport system communicates with an ingress or egress for at least one work station. However, Hinds does not teach the transport system operating within an environment including ambient air and a structure associated with the environment for circulating ambient air therethrough to remove particulate including ambient air. Pardo teaches the transport system operating within an environment including ambient air and a structure associated with the environment for circulating ambient air therethrough to remove particulate material from the ambient air. As for claim 1, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the apparatus of Hinds, with a structure associated with the environment for circulating ambient air, in view of the teachings of Pardo, in order to minimize any contamination for particulate matter. Regarding claim 2, Hinds does not teach a packaging station. Pardo teaches a packaging station operating within an

environment . Regarding claim 2, it would have been obvious to person of ordinary skill in the art at the time the invention was made to modify the apparatus of Hinds, with a sealed packaging station, in view of the teachings of Pardo, in order to minimize any contamination from particulate matter. Regarding claim 3, the specific level of filtration for the combination of Hinds as modified by Partdo is considered to be obvious to a person of ordinary skill in the art at the time the invention was made depending on the specific particulate that is desired to be removed.
